-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 21-34, 104-117 and 127-132 is/are pending in the application.
- 4a) Of the above claim(s) 127-132 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 21-34 and 104-117 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.

DETAILED ACTION

1. The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group **Art Unit 2646**.

2. This communication is responsive to the amendment dated 01/10/2005.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 C.F.R.1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 21-34 and 104-117 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-44 of U.S. Patent No.

Art Unit: 2643

6,393,130. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-44 of U.S. Patent No. 6,393,130 are similar in scope to claims 21-34 and 104-117 of this application with obvious wording variations.

Claims 21-34 and 104-117 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,584,207. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-28 of U.S. Patent No. 6,584,207 are similar in scope to claims 21-34 and 104-117 of this application with obvious wording variations.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 21-27, 29, 32-34, 104-110, 112 and 115-117 are rejected under 35 U.S.C. 102(b) as being anticipated by Aceti et al. (U. S. Pat. - 5,530,763).

Regarding claims 21-22 and 104-105, Aceti et al. disclose a hearing aid comprising: a deformable skin (2) bounding an internal region (Fig. 1); and at least one spine (5) extending axially along an interior surface of the skin, which is attached thereto sufficiently so as to provide insertion rigidity when inserted into the user's ear canal as claimed.

Regarding claims 23-24 and 106-107, Aceti et al. further disclose the hearing aid, wherein further comprises an output transducer (41) and a vent (Fig. 3), and the skin and spine,

Art Unit: 2643

but not an output transducer, are distorted on insertion into the ear canal (col. 5, lines 27-35) as claimed.

Regarding claims 25-27, 32-33, 108-110 and 115-116, Aceti et al. further disclose the hearing aid, wherein a deformable matrix (1) applying expansive forces to the skin.

Regarding claims 29 and 112, Aceti et al. further disclose the hearing aid, wherein an audio output transducer (41) surrounded, at least in part, by a compressible matrix (Figs. 1-2) as claimed.

Regarding claims 34 and 117, Aceti et al. further disclose the hearing aid, wherein a faceplate (3) attached to the skin.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 28, 30-31, 111 and 113-114 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aceti et al. (U. S. Pat. - 5,530,763).

Regarding claims 28 and 111, Aceti et al. do not clearly teach a plurality of ribs as claimed. Since providing a plurality of ribs formed on an exterior periphery of a hearing aid skin is very well known in the art, it therefore would have been obvious to one skilled in the art at the time the invention was made to provide a plurality of suitable ribs formed on an exterior periphery of the skin of the hearing aid as a cerumen trapper, in order to protect the hearing aid.

Art Unit: 2643

Regarding claims 30-31 and 113-114, Aceti et al. do not clearly teach the matrix comprises at least one of open cell foam, closed cell foam, and a fabric as claimed. Since providing a desirable otoplastic material for the hearing aid housing is very well known in the art, it therefore would have been obvious to one skilled in the art at the time the invention was made to provide a suitable otoplastic material, such as at least one of an open cell foam, a closed cell foam, and a fabric for the hearing aid, in order to provide more comfort to users.

Response to Amendment

6. Regarding the newly submitted claims 127-132 directed to an invention that is independent or distinct from the invention originally claimed, which contains newly introduced limitations, such as **“first and second ends ... the matrix is movable relative to the skin ... at least one hollow spine ...”** with all the limitations added, which clearly are not from the elected invention originally claimed (claims 21-34 and 104-117).

Since applicants have received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 127-132 are not original presented and elected and are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

7. Applicant's arguments dated 01/10/2005 have been fully considered, but they are moot in view of the new ground(s) of rejection.
